

## Installationsbeskrivning för osCommerce och Payson modulen

Börja med att ladda ner de senaste versionerna av osCommerce och Paysons modul till osCommerce. Vår senaste modul kan du hitta på följande sida: <https://github.com/PaysonAB/module-payson-oscommerce>

När den hämtningen är klar gå till osCommerce hemsida för att hämta hem den senaste versionen.

The screenshot shows the GitHub repository page for **PaysonAB / module-payson-oscommerce**. At the top, there are buttons for 'Unwatch' (2), 'Star' (0), and 'Fork' (0). Below the repository name, it says 'Module for OsCommerce — Edit'. A summary bar shows '5 commits', '1 branch', '0 releases', and '1 contributor'. Below this, there's a green 'branch: master' dropdown and the repository name 'module-payson-oscommerce' with a plus icon. The main content is a table of files and their commit history:

File	Commit Message	Time Ago
admin	Initial commit.	9 months ago
ext	Bugfix: lpn-request	4 months ago
images	Initial commit.	9 months ago
includes	Updated version number.	4 months ago
.gitattributes	Initial commit.	9 months ago
.gitignore	Initial commit.	9 months ago
Installationsanvisning.doc	Initial commit.	9 months ago
Installationsanvisning.pdf	Initial commit.	9 months ago
README.md	Initial commit.	9 months ago
readme.txt	Updated the text.	4 months ago

On the right side, there's a sidebar with links to 'Code', 'Issues' (0), 'Pull Requests' (0), 'Wiki', 'Pulse', 'Graphs', 'Network', and 'Settings'. At the bottom of the sidebar, there's a section for 'HTTPS clone URL' with the URL <https://github.com/PaysonAB/module-payson-oscommerce> and buttons for 'Clone in Desktop' and 'Download ZIP'.

Vi börjar med att gå igenom installationen osCommerce, sedan beskriver vi hur modulen ska installeras till osCommerce. I denna beskrivning förutsätter vi att ni har en server och en databas som ni kan installera webbutiken till.

När ni har laggt upp alla filer på er FTP server eller lokalserver och för första gången ansluter till installationsfilerna via webbläsaren, då borde ni få upp denna bild. Klicka på start för att påbörja installationen.

### New Installation

The webserver environment has been verified to proceed with a successful installation and configuration of your online store.

Please continue to start the installation procedure.

[▶ Start](#)

Nästa ruta ni kommer till är det dags att fylla i era uppgifter för er databas. Klicka sedan på Continue.

[osCommerce Website](#) | [Support](#) | [Documentation](#)

## New Installation

This web-based installation routine will correctly setup and configure osCommerce Online Merchant to run on this server.

Please follow the on-screen instructions that will take you through the database server, web server, and store configuration options. If help is needed at any stage, please consult the documentation or seek help at the community support forums.

1. Database Server
2. Web Server
3. Online Store Settings
4. Finished!

### Step 1: Database Server

The database server stores the content of the online store such as product information, customer information, and the orders that have been made.

Please consult your server administrator if your database server parameters are not yet known.

### Database Server

#### Database Server

The address of the database server in the form of a hostname or IP address.

#### Username

The username used to connect to the database server.

#### Password

The password that is used together with the username to connect to the database server.

#### Database Name

The name of the database to hold the data in.

▶ Continue

 [Administration Tool](#)

### Post-Installation Notes

It is recommended to follow the following post-installation steps to secure your osCommerce Online Merchant online store:

1. Delete the C:/modules/oscommerceinstall/install directory.
2. Rename the Administration Tool directory located at C:/modules/oscommerceinstall/admin.
3. Set the permissions on C:/modules/oscommerceinstall/includes/configure.php to 644 (or 444 if this file is still writable).
4. Set the permissions on C:/modules/oscommerceinstall/admin/includes/configure.php to 644 (or 444 if this file is still writable).
5. Review the directory permissions on the Administration Tool -> Tools -> Security Directory Permissions page.
6. The Administration Tool should be further protected using htaccess/htpasswd and can be set-up within the Configuration -> Administrators page.

Ni bör sedan få se samma vy som nedan. Notera den gula varningsrutan på vänster sida, följ de instruktioner som står i den för att göra er webbutik lite säkrare. I nästa steg inleds installationen för vår modul till osCommerce.

## Installationsanvisning för Payson modulen

1. Kör backup på din osCommerce -butik och din databas innan du börjar installera modulen.
2. Extrahera ZIP-filen för vår modul till osCommerce
3. Kopiera mapparna från de nyligen extraherade ZIP-filen till där ni har er osCommerce -butik.
4. Öppna filen checkout\_process.php som ligger i roten av er osCommerce mapp.

Lägg där till följande två rader:

```
// Processing engine for payson  
  
include('ext/modules/payment/payson/payson_payments_process.php');
```

Efter denna rad:

```
include('includes/application_top.php');
```

Välj därefter att spara och stäng filen.

Gå sedan tillbaka till er administratör sida för osCommerce och klicka på vänster sida i menyn på Modules, och välj sedan Payments. Ni bör då se samma vy som nedan. Här ska ni gå på vänster sida och klicka på knappen Install Module.

## Matrox G400 32MB

[MG400-32MB]

### Dramatically Different High Performance Graphics

Introducing the Millennium G400 Series - a dramatically different, high performance graphics experience. Armed with the industry's fastest graphics chip, the Millennium G400 Series takes explosive acceleration two steps further by adding unprecedented image quality, along with the most versatile display options for all your 3D, 2D and DVD applications. As the most powerful and innovative tools in your PC's arsenal, the Millennium G400 Series will not only change the way you see graphics, but will revolutionize the way you use your computer.

#### Key features:

- New Matrox G400 256-bit DualBus graphics chip
- Explosive 3D, 2D and DVD performance
- DualHead Display
- Superior DVD and TV output
- 3D Environment-Mapped Bump Mapping
- Vibrant Color Quality rendering
- UltraSharp DAC of up to 360 MHz
- 3D Rendering Array Processor
- Support for 16 or 32 MB of memory

#### Available Options:

## Avancerade funktioner

### Skatteklass

Alla ordertotalvariabler kommer att addera skatt baserat på den skatt man ställt in under rubriken Tax Class.

### Vilka valutor skall accepteras

Under rubriken Accepted Currencies kan man fylla i vilka valutor som skall vara möjliga att använda sig av. Denna komma separeras för att acceptera flera valutor. Tänk på att vår betalning lösning bara fungera med Svenska kronor och Euro.

### Växla till valuta

Här anges valutakoden för den valuta som växlingar skall ske till. Standard här är SEK.

### Logga till mail

Under rubriken Email Logg adress kan en e-postadress ange för att skicka meddelande från Payson till. Kan användas vid felsökning.

### Transaktioner endast möjliga i en specifik betalzon

Under rubriken Payment Zone kan man välja att en transaktion endast skall kunna göras vid rätt betalzon.

## Begränsningar

### Värdesomräkning

Oscommerce har en inställning som styr hur många decimaler som skall användas vid beräkning. Om denna är inställt till 0 för den aktuella valutan medför detta att totalpriset beräknas med hjälp av produkter och ordertotal med 0 decimaler i produktpriset. Paysonmodulen använder 3 decimaler vid beräkningar och 2 decimaler när summan skickas in till Payson. Här rekommenderar vi att butiken använder 2 decimaler vid omräkning. Annars kan summan i din butik och summan hos Payson skilja sig från varandra.
